

Arda Erinc Oguz

Junior Web Developer

I am an energetic and people-oriented individual, with a background in science and a conscientious and enthusiastic approach to my work. I work well in a team and am able to establish productive working relationships with them, with my clients, and everyone I get to meet amidst my work.

I'm looking to put into practice the skills I've learned at Coder Academy, and advance my capabilities in Web Development

- Node.js

Social

Work History

Wicky - September 2023 - Present

Junior Developer - Casual

Currently working at Wicky, a sports data analytics company, assisting in improving their data insights representation through developing new features for their website and improving existing components, including:

- Creating a web page to display Women's Cricket data to better cover the sport in order to drive user engagement.
- Troubleshooting & Improving data querying for Cricket data tools used by users for more accurate representation.
- Expanding sport coverage by creating webpages to present new sport data and expand our target audience.
- Created a new 'Bet Tracker' to provide a novel feature to increase user engagement with the website

Gorilla Jobs - 2022 - 2023

Recruitment Associate - VIC Legal Division - Full-Time

Worked as a Legal Recruitment Associate for Gorilla Jobs, a recruitment agency specialised in healthcare, legal, and pharmaceutical recruitment across Australia. My role was based in their Legal Division for Victoria.

Loan Base - Feb 2020 - November 2020

Mortgage Broker's Assistant - Full-Time / Part-Time

Worked at an independent mortgage brokering company as an intern then as a permanent part-time employee. I assisted and helped execute various stages of loan processing, moving them from initial point of contact to full loan approval.

White Cockatoo Hotel - 2019 - Present

Bartender / Host - Casual

This helped to break up my time while studying and provided much needed novelty and diversity. While my time at university taught me diligence, discipline and wider skills through academia, The White Cockatoo developed my ability to communicate, to cooperate and manage my time and work, and the expectations of my guests.

Current Projects

- Terminal Application: As part of my course, I built a terminal web application via python: a basic turn-based game to exercise some of the skills I learned throughout the course
- Full Stack MERN Application: The capstone project of my course emulated a rudimentary rostering system using the MERN Stack
- Wicky Data Products: Created & maintained webpages to display relevant sports data to users.
