Social

Arda Erinc Oguz
Junior Web Developer

I am an energetic and people-oriented individual, with a background in science and a conscientious and enthusiastic approach to my work. I work well in a team and am able to establish productive working relationships with them, with my clients, and everyone I get to meet amidst my work.

I'm looking to put into practice the skills I've learned at Coder Academy, and advance my capabilities in Web Development

Work History

September 2023 - Present
Wicky
Web Development Industry Placement - Full Time / Casual

Currently working at Wicky, a sports data analytics company, assisting in improving their data insights representation through developing new features for their website and improving existing components to better serve their users.

July 2019 - Present
White Cockatoo Hotel
Bartender / Host - Casual

Worked as a Legal Recruitment Associate for Gorilla Jobs, a recruitment agency specialised in healthcare, legal, and pharmaceutical recruitment across Australia. My role was based in their Legal Division for Victoria.

2022 - 2023
Gorilla Jobs
Recruitment Associate - VIC Legal Division - Full Time

Worked as a Legal Recruitment Associate for Gorilla Jobs, a recruitment agency specialised in healthcare, legal, and pharmaceutical recruitment across Australia. My role was based in their Legal Division for Victoria.

2020
Loan Base
Mortgage Broker's Assistant

Worked at an independent mortgage brokering company as an intern then as a permanent part-time employee. I assisted and helped execute various stages of loan processing, moving them from initial point of contact to full loan approval.

Current Projects

- <u>Portfolio:</u> **One of my first projects was the establishment and upkeep of my portfolio website, to display some of my web-development proficiency, character, and my story.**
- <u>Terminal Application:</u> **As part of my course, I built a terminal web application via python: a basic turn-based game to exercise some of the skills I learned throughout the course**
- <u>Full Stack MERN Application:</u> **The capstone project of my course emulated a rudimentary rostering system using the MERN Stack**
